PROFESSIONAL SUMMARY

Full-stack web developer experienced in all stages of software development, from specification to quality assurance. Skilled in solving complex problems and troubleshooting technical issues. Strong collaboration and interpersonal abilities. Quick to grasp new technical concepts and apply them effectively.

WORK EXPERIENCE

Crion Technologies

Backend Developer | April 2024-present

Job responsibilities:

- Developed and maintained the backend of an Asset Management System, including API design and implementation.
- Built an Asset Maintenance System that automated recurring maintenance tasks using logs and checklists.
- Managed large datasets and developed a Report Management System for performance analysis and reporting.

FIVOT

Software Development Engineer | June 2023 - January 2024

Job responsibilities:

- Built a resilient backend system using NodeJS, MongoDB, S3, NestJS, and Python's FastAPI, featuring group creation, task assignment, and task reminder notifications.
- Implemented document and folder sharing with detailed access control, similar to Google Drive, and document format conversion (e.g. PDF to JPG) using FastAPI.
- Collaborated effectively with Android developers to ensure seamless application integration.

PROJECTS

1. Scheduler(Tutor Booking System) | 🌐 | ⭕

Express.js | Node.js | MongoDB | HTML5 | CSS3 | RESTful APIs | JavaScript | Node-mailer | Redis

- This website allows students to search and book tutoring sessions.
- Implemented features such as student and teacher registration, login, session feedback submission, and tutor booking with slot choices.
- Built an admin panel for managing users, sessions, and feedback.

2. Audience - Poll | 🌐 | ⭕

JavaScript | Express.js | MongoDB | RESTful APIs | HTML5 | CSS3 | Node.js | Socket

- Developed a real-time quiz application with features like quiz creation, user authentication, and live quiz result tracking.
- Implemented real-time updates and interactions using Socket.io.
